Professional Summary

Aspiring Software Engineer at IIIT Allahabad with strong foundations in **distributed systems, backend development and full-stack engineering**. Experienced in building **scalable, secure RESTful APIs** using the MERN stack with verified **sub-150ms latency**. Solved **500+ algorithmic problems** across competitive platforms, focused on performance optimization and production-grade cloud services., familiar with **Agile** and **Scrum** development methodologies

Education

Indian Institute of Information Technology Allahabad

B.Tech in Electronics and Communication Engineering

2024 – 2028(Expected)

CGPA: 7.8/10 (till 3rd Sem)

Sheiling House School, Kanpur

Intermediate (ISC Board)

2024

Percentage: 86%

Technical Skills

Languages: Python, C++, C, Java, JavaScript (ES6+), TypeScript, HTML, CSS
Frameworks: Node.js, Express.js, React.js, Next.js 15, Tailwind CSS, Framer Motion
Databases/Cloud: MongoDB Atlas, PostgreSQL, MySQL, Firebase, Cloudinary
Tools: Git, GitHub, Postman, JWT, Bcrypt, Multer, Axios, REST APIs, Vercel, Render

Projects

Appointo – Full Stack Health-Tech Platform

[GitHub](#) | [Live](#)

- **Multi-Role System:** Engineered three independent panels for Patients, Doctors, and Administrators, each with distinct dashboards, role-based access control, and dedicated workflows deployed on cloud infrastructure.
- **Distributed Architecture:** Built a MERN backend using **MVC architecture** to manage high-concurrency appointment scheduling across multiple user roles and services.
- **Performance:** Achieved average API latency of **142ms** through optimized **MongoDB Atlas** indexing and JSON payload management (avg. 2.1KB).
- **Security:** Implemented **stateless JWT authentication** and **Bcrypt** hashing with custom middleware enforcing role-based access control (RBAC) across all three panels.
- **File Handling:** Integrated **Multer** for multipart file uploads and **Cloudinary** for scalable cloud-based media storage and delivery.

Next.js Performance Portfolio

[GitHub](#) | [Live](#)

- **Modern Web Stack:** Built using **Next.js 15 App Router** and **TypeScript**, achieving **96/100 Google Lighthouse** performance score and **100/100 SEO** score.
- **Optimization:** Reduced **LCP to 0.8s** via Server-Side Rendering (SSR), Next/Image optimization, and priority asset loading.
- **GPU Rendering:** Engineered a custom particle interaction system using **HTML5 Canvas API** and **Framer Motion**, maintaining stable **60 FPS** through GPU-accelerated rendering.

Achievements

- **Competitive Programming:** Solved **500+ problems** on LeetCode and CodeChef; secured global ranks **96** (Div 3), **152** (Div 4), **237** (Div 2) among 65,000+ participants.
- **Full-Stack Deployment:** Engineered and deployed multiple production-grade applications with **100/100 Lighthouse** scores and robust stateless security architectures on cloud platforms.
- **API Performance:** Consistently achieved **sub-150ms API response times** in production through advanced algorithmic optimization and efficient system design.
